Quebec curved doors in pippy oak

Out of the woods

Enhance your kitchen with wooden doors and units by GreyGreen. Wood wears well, ages with dignity and can subtly change colour over time – maple, for example, takes on a pinkish hue. Lively grains in woods such as pippy oak (see picture), ash and walnut will lift a kitchen from the mundane, so call GreyGreen for a free home consultation. Look out for their spring offers on British-made kitchens.
